Subject: INCORPORATION OF A COMPANY IN CYPRUS

Dear Geoffrey,

This client is from Europe. She wants to set up a company in the EU. These are her details and request:

1. She is a Swedish national, XXXXXXXXXXXXX.
2. She wants to set up a company for: consulting activities in EU affairs (monitoring, strategic advise, communication, lobbying), but also in the long term envisage business opportunities in Sweden, buy a property, and set up a business in another field.
3. Mainly (physically) operate from Brussels but also from Sweden, France.
4. Envisaged income from consulting activities - in the beginning: 4000€-6000€/month and would like to deduct the following expenses: car leasing, petrol expenses, telephone and internet bill, Representation costs, travels. Also, she is even evaluating to include the rent of her apartment as she will be working from home. She is also envisaging to buy an apartment (as a private person) and "my" company would pay me a rent. Pension saving, Health insurance. She also wants to be able to pay myself a salary, or a yearly dividend.
5. She also asked whether still be possible to have XXXXXXXXXXXXX as a residence, principal or secondary residence?

I suggested this person to us a Cyprus company for this purpose, because of the 10% corporate tax that you pay on net income. However, please let me know your comments, if it will be feasible to assist this client from Cyprus.

Kind regards,

**Edison XXXX
